Interview summary: exp_002

(Former P_01 in the focus group)

Fairness

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

In my opinion, the ethical dimension of F4 may not be sufficiently clear. Some elements of the scenario could shift the focus toward operational efficiency rather than fairness considerations. Additional context or elements could help to clarify the ethical implications of the decision.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

In my opinion, F1 does not reflect the intended ethical aspect as the primary consideration. Its formulation may lead to an overlap with considerations related to privacy and data protection.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The alternatives in scenario F3 may not differ sufficiently in the extent to which they reflect the intended ethical aspect. Referring specifically to older users could reinforce age-related stereotypes, but it does not necessarily represent a less ethical position in terms of fairness. Moreover, the scenario does not adequately address the potential implications of associating the guided mode with a particular age group, potentially overlooking other users who could also benefit from it.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In scenario F4, the choice may also be influenced by operational efficiency considerations, making it difficult to determine whether the response primarily reflects an ethical preference.

Q: Additional comments (if any)

No further comments

Inclusiveness

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

The implementation decisions described in the statements involve ethically relevant considerations.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

In scenario I4, although the implementation choices primarily reflect inclusiveness, there may also be an overlap with fairness considerations, as limiting compatibility with older devices could introduce different treatment or constraints for certain groups of users.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The options presented in the scenarios clearly distinguish between different positions regarding the intended ethical aspect.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In scenario I1, the developer's choice may also be influenced by technical considerations, accessibility standards, or implementation requirements. Therefore, the response may not provide sufficient evidence to distinguish the developer's ethical preference from other factors influencing the decision.

Q: Additional comments (if any)

No further comments

Privacy

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

The implementation decisions described in the statements involve ethically relevant considerations.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

The statements primarily reflect the intended ethical aspect.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The options presented in the scenarios clearly distinguish between different positions regarding the intended ethical aspect.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In scenario P1, the developer's response may reflect compliance considerations rather than necessarily indicating an ethical preference.
In scenario P2, the developer's choice may be influenced by the aim of improving service quality and the accuracy of recommendations. Moreover, the possibility of using precise location with the user's permission may influence the developer's decision, making it difficult to determine whether the response primarily reflects their ethical preference.
In scenario P3, the developer's choice may be influenced by considerations related to technical functionality and respect for user preferences, rather than necessarily reflecting an ethical preference.

Q: Additional comments (if any)

No further comments

Transparency and Explainability

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

The implementation decisions described in the statements involve ethically relevant considerations.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

The statements primarily reflect the intended ethical aspect.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The alternatives presented in the scenarios allow for a clear distinction between different positions regarding the intended ethical aspect.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In TE1, the developer’s response may be influenced by technical considerations rather than necessarily indicating an ethical preference.

Q: Additional comments (if any)

No further comments

Traceability

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

In TR2, although the implementation decision enhances traceability, its ethical relevance appears limited, given the minor nature of the changes being tracked.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

The statements primarily reflect the intended ethical aspect.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The alternatives presented in the scenarios allow for a clear distinction between different positions regarding the intended ethical aspect.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In TR4, the developer's choice may reflect a need to ensure accountability in the validation process rather than an ethical preference for traceability.

Q: Additional comments (if any)

No further comments

Resource Consumption

Q: Does the implementation decision described in the statements involve an ethically relevant consideration?

The implementation decisions described in the statements involve ethically relevant considerations.

Q: Do the statements primarily reflect the intended ethical aspect, rather than the others?

The statements primarily reflect the intended ethical aspect.

Q: Do the alternative implementation choices in the scenarios differ meaningfully in the extent to which they reflect the ethical aspect?

The alternatives presented in the scenarios allow for a clear distinction between different positions regarding the intended ethical aspect.

Q: Could a developer's response to this scenario provide evidence about their preference regarding the ethical aspect?

In scenario RC2, the developer's choice may be primarily motivated by operational efficiency or performance considerations rather than by an ethical preference.

Q: Additional comments (if any)

No further comments

Final Questions

Q: Do you think that the proposed five-point response scale is appropriate for expressing the developer's preference regarding the described implementation choice?

Yes, I believe it could be appropriate

Q: Do you think that averaging the statements scores is an appropriate aggregation strategy?

Not entirely, as the scenarios, although related to the same ethical aspect, involve different situations with varying levels of significance and impact. Averaging the scores may dilute the importance that the developer assigns to each specific implementation decision.

Q: Should all statements contribute equally to the aspect score?

Not necessarily, as the statements may not be equally representative of the ethical aspect being assessed, given the context and implications of each scenario.

Authors' summary

- For F1, the ethical aspect is not clear (it also concern with privacy).
- Some elements of F4 may shift the focus towards operational efficiency rather than fairness
- I4 may also partially overlap with fairness, since limiting compatibility may be a cause of exclusion.
  Authors' response: this is actually inclusiveness
- The scenario I1 may also be influenced by technical considerations. Same for P1, P2, P3, TE1, and RC2.
- Averaging the scores may dilute the importance assigned to each decision
